Minutes for Public Meeting for Dovehouse Road
Held at Hillcrest Public Library on Tuesday the 14th of October 2008.

Meeting opened 6pm

Professional Team Present:	Johan Bodenstein, Shelley Kirby
Registered I&APs:	Frans Otter Brett Dixon

Due to the low turnout, an informal discussion was held between the professional team and Mr. Otter and Mr. Dixon regarding the project.

Mr. Dixon raised a concern about whether the development would be planted with indigenous species.
Mr. Bodenstein responded by reassuring Mr. Dixon that only indigenous species would be planted and explained the concept of a Rehabilitation Plan and an Environmental Management Plan.

Mr. Dixon asked about whether fencing would be erected and if so, what type. His concern was the effect fencing would have on the local wildlife.
Mr. Bodenstein responded by explaining that the development would have to be fenced for security reasons and to mark the boundary of the property. He went on to explain that the it was a requirement of the city that all fencing be permeable – allowing animals to pass through.

Mr. Dixon enquired about whether pets would be permitted within the development.
Mr. Bodenstein responded that he was unsure but would assume that there would probably be an allowance for small dogs but not for cats or larger dogs.

Mr. Dixon asked whether an architectural style had been finalized and whether they would be allowed to have input into this.
Mr. Bodenstein could not confirm the architectural style but assured Mr. Dixon that it would be available tin the Draft Scoping Report for comment.

No other issues were raised.
Meeting closed 7.30pm
